

Dairy Comp 305

On farm dairy management software for herds greater than 300 cows

- ❖ Six screens of information per animal, including past lactations, DHI test data and individual cow lactation curves, with the option to add a 7th screen with notes, animal photo, and PDF Pedigree file.
- ❖ Comes with many standard Events and Items, and allows creation of Events and Items specific to your dairy.
- ❖ Ability to graph and/or plot most cow, group or herd items against time or other items.
- ❖ Can be customized to a variety of dairy management styles.
- ❖ Report variety limited only by the users imagination and sorting criteria.
- ❖ Manage Synchronization programs easily and track Johne's disease testing and results.
- ❖ Daily task scheduler set to automatically print reports when needed.
- ❖ Herd health features such as entering diseases and treatments, producing vet lists and analyzing reoccurrences.
- ❖ Manage hospital cows – treatment protocols, treatment status, milk and beef withhold dates.
- ❖ Information is available for consultants upon herd owner's request.
- ❖ Capable of connecting with on-farm milking systems and transfer information to and from other computers.
- ❖ Interfacing with DHIA, milk meters and other software.
- ❖ Analyze reproductive data based on sires, studs, technicians, breeding codes, or day of the week.
- ❖ Monitor herd performance on different parameters: production, SCC, inventory, and herd health.
- ❖ Monitor bulk tank SCC based on herd and individual cow basis.
- ❖ Track your own semen inventory (track bull ID, tank ID, cost, # units).
- ❖ Track active AI sires using current proofs; review individual sires, print lists, analyze sires and service sires and produce least-cost sire analysis.
