

# Scout

On farm dairy management  
software for herds up to 300 cows

## Advantages of Using Scout:

- ❖ Six screens of information per animal, including past lactations, DHI test data and individual cow lactation curves, with the option to add a 7<sup>th</sup> screen with notes, animal photo, and PDF Pedigree file.
- ❖ Events (Fresh, Bred, Mast, etc) and Items such as DSLH—Days Since Last Heat give users the ability to record and access information needed to manage their dairy
- ❖ Generate work lists such as: Cows to Breed, Cows to Dry Off, Vet lists, and Vaccination lists
- ❖ Customized Vet Check List and other reports
- ❖ Set up Synchronization programs and track Johne's Disease testing and results.
- ❖ Look at current and previous lactation individual cow records with health events
- ❖ Information available for consultants upon herd owner requests
- ❖ Summaries and graphs can be generated to identify areas where gains can be made in reproduction, production, and disease incidence
- ❖ Traditional Event Tracking: Calvings, Breedings, Dry, and Sold Cows
- ❖ Action Lists, Work Lists, and Analysis Functions
- ❖ Easy to Learn and easy to use with built in quick data entry features
- ❖ Affordable
