# **Minnesota DHIA News**

A PUBLICATION OF MINNESOTA DHIA

Volume 24 Issue 1

**JANUARY 2024** 

## Winter member meeting schedule

Minnesota DHIA member meetings are scheduled for 75 minutes and start with a 15-minute business meeting to include nominations for south-central, southeast, and metro directors and state delegate nominations, and brief announcements. This will be followed by the featured speaker. Attend one or all!

February 15, 2024 - 12:30 PM

#### "What's new" mini-series

Three speakers are welcomed in to give a high-level overview of their projects related to collection and use of milk recording data followed by a group roundtable Q&A. Topics include (a) Initiatives of National DHIA, (b) Research and development of genetic evaluations, and (c) HerdHQ: Intro to a new web-based platform for on-farm management.

February 20, 2024 - 12:30 PM

#### Milk fatty acids: results and application

Brad Heins, Professor, University of Minnesota WCROC, Morris

Brad specializes in applied research in many areas of dairy cattle management, especially organic and grazing systems, housing, genetics, and energy use for dairies. He is currently leading a project on Fatty Acid yields and ratios and how milk fatty acids can provide insight in the on-farm management of feedstuffs, grazing, breed composition, methane production, and more.

February 21, 2024 - 12:30 PM

#### Mental health on the farm

Ted Matthews, Director of MN Rural Mental Health, MN Dept of Agriculture

Ted is a mental health practitioner with over 30 years of experience in counseling in rural areas. He has extensive counseling experience in the areas of PTSD, crisis intervention, family issues, suicidology and domestic abuse. Ted's focus has been farmer mental health support in recent years. He fully understands the extreme pressure that farmers are facing today. Ted is the local expert who farmers across the state call with a question about mental health or suicide. He further offers his expertise to help the general population to better understand farming culture.

February 28, 2024 - 12:30 PM

#### Developing a national genetic evaluation for dairy cow mobility and hoof health

Gerard Cramer, Associate professor, Dept of Vet Population Med, Univ. of Minnesota

Gerard's research focus is to develop and evaluate safe and effective prevention and intervention strategies for common foot diseases. He is the research lead on a grant with CDCB to aggregate observations from mobility camera and hoof health records provided by farms to create a pipeline for genetic evaluation of hoof health and on-farm hoof health management tools.

February 29, 2024 - 12:30 PM

#### Dry-off and selective dry cow therapy best practices

Luciano Caixeta, Associate professor, Dept of Vet Population Med, Univ. of Minnesota

Luciano's research interests include metabolic and infectious diseases, Immune response and immunotherapeutics, and dairy systems biology. Here, he presents important considerations for the dry period, including blanket vs selective dry cow therapy, teat sealant, considerations for high-producing cows prior to dry-off, and grouping strategy.

#### DART user's webinar

A DART webinar (separate from the Member meetings series) is being organized. A few basic topics will be covered such as event entry, setting up protocols, changing cow information, & building reports. A substantial amount of time will be devoted to addressing your specific questions. Date and time will be forthcoming.

**REGISTER TODAY** for one or several webinars by emailing Nancy Zander at <u>NancyZ@mndhia.org</u> and she will email you the Zoom link prior to the meeting.

# More robust herd insights available with HerdHQ

Last month, we talked about HerdHQ, a new suite of online herd management tools for herd owners & managers, and their consultants. Specifically, we covered the generalities of the HerdHQ tools, and took a deeper look at CowCompass and KeepOrBeef. To catch up on those topics, refer back to the December *Minnesota DHIA News* or see our HerdHQ info on our website: <a href="https://www.mndhia.org/HerdHQ">www.mndhia.org/HerdHQ</a>.

HerdHQ is available to ALL herds processing with DRMS. However, more frequent data input is a feature specifically available for DART users.

#### What makes HerdHQ unique?

- Easy to set up for herd owners managers with **no need for special programming and software**
- Pre-designed reports allow for easy modification on your own time and without external support
- Input data comes from either your test day results or daily DartSync upload (DART users)
- Fast insights and decision making!

Minnesota DHIA is working with processing center, DRMS, to fine-tune knowledge and training around HerdHQ for dairy producers and consultants—and we're learning too! Recently announced: **HerdHQ is now available free during January 2024**; **plus, member accounts will be given a 30-day free trial** for each of the 6 tools starting February 1<sup>st</sup>. Each tool's trial period may be initiated separately. Ongoing pricing for HerdHQ will be forthcoming.

Be an early adopter! Join Minnesota DHIA and our DRMS partners for a free HerdHQ test drive. Please email Amy Loeschke at <a href="mailto:AmyL@mndhia.org">AmyL@mndhia.org</a> for more info and to get started.

In this months' *Minnesota DHIA News*, read on for an in-depth look at **DairyDepot and HeiferHub**. Stay tuned for our February *Minnesota DHIA News* for features on ActivityAlerts and MilkMetrics.

## HeiferHub from HerdHQ

Use your breeding, culling, and calving performance to **project inventories of future heifer replacements under various semen usage scenarios**. Then, input your market prices for heifers, dairy bull calves, and beef-on-dairy bull calves plus semen cost to **compute profit scenarios from your semen usage** (example below). Use HeiferHub's flexibility to adjust desired outcomes and make semen purchase decisions with confidence. Both 9-month and 30-month projected heifer inventories are calculated. Monitor recent weeks and months to see whether your herd is on track to achieve breeding and replacement goals.

(continued on Page 3)

### DairyDepot from HerdHQ

**Build your own personalized dashboard** from over 100 new tables, charts, and graphs to monitor herd performance across a variety of herd management areas (example image below). **View historic trends and current performance** of your herd beyond the presets available in DART. Includes several click-able grids and graphs to view individual cow data.

Interested in using Herd HQ? Email Amy Loeschke at <a href="mailto:AmyL@mndhia.org">AmyL@mndhia.org</a>. Please include your herd code, contact name and phone number. Amy can then grant you access.

# **Transferring in New Cows?**

Our data handling systems make this process easy. No keying in lengthy REG or TAG numbers, pedigrees, and historical events.

Have these 2 items available for your field tech on sample day:

- · the 8-digit herdcode from her original herd, and
- her permanent ID (Index or BarnName).

For herds with software, cows that originated in another Minnesota DHIA herd can be transferred immediately.

Contact Alicia Vogl (Alicia V@mndhia.org or 763-682-1091 ext. 36)
